Application No. 10/797,144 Docket No.: 1188-0118PUS1 Supplemental Amendment dated August 24, 2006

Reply to Office Action of April 5, 2006

AMENDMENTS TO THE CLAIMS

1. (Cancelled).

2. (Currently amended) A multi-branched polymer comprising at least one block structure

or graft structure represented by the following general formula (II):

$$(P^2)(P^3) - X^1$$
 ----(II)

wherein P² is a polar polymer chain having polyolefin side chains (A4) having a number-average molecular weight (Mn) of 500 to 1,000,000, and P³ is a polymer chain having a number-average molecular weight (Mn) of 500 to 1,000,000, selected from a polyolefin chain (A1) <u>obtained by (co)polymerizing one or more olefins selected from C₄₋₂₀ linear or branched α-olefins and vinyl <u>halides</u>. a polyolefin chain having polar polymer side chains (A2), a polar polymer chain (A3) and a polar polymer chain having polyolefin side chains (A4); P² and P³ may be the same or different from each other; X¹ is a linking <u>hydrocarbon</u> group containing less than 200 atoms in total <u>which may be substituted with hydroxyl group</u>, halogen atom or carboxyl group, and containing a group selected from an ester group, an amide group and an ether group.</u>

3. (Previously presented) A multi-branched polymer comprising a star-shaped structure having three polymer chains bound to a central nucleus represented by the following general formula (III):

$$(P^4)(P^5)_2 - X^2$$
 ----(III)

wherein P⁴ is a polyolefin chain (A1) having a number-average molecular weight (Mn) of 500 to 1,000,000; P⁵ is a polymer chain having a number-average molecular weight (Mn) of 500 to 1,000,000, selected from a polyolefin chain (A1), a polar polymer chain (A3) and a polar

Application No. 10/797,144 Docket No.: 1188-0118PUS1 Supplemental Amendment dated August 24, 2006

Reply to Office Action of April 5, 2006

polymer chain having polyolefin side chains (A4); three polymer chains represented by P4 and

two P⁵s may be the same or different from one another; X² is a linking group containing less than 200 atoms in total and comprising i) at least two ether moieties, ii) at least two ester moieties or

iii) at least one ether moiety and at least one ester moiety.

4. (Previously presented) A multi-branched polymer comprising a star-shaped structure

having three or more polymer chains bound to a central nucleus represented by the following

general formula (IV):

$$(P^6)_{n'} - X^3 - (IV)$$

wherein n' is an integer of 3 or more; P6 is a polymer chain having a number-average molecular

weight (Mn) of 500 to 1,000,000, selected from a polyolefin chain (A1), a polar polymer chain

(A3) and a polar polymer chain having polyolefin side chains (A4); a plurality of P⁶s may be the

same or different from one another provided that every P⁶ is not the polar polymer chain (A3):

and X3 is a linking group of less than 200 atoms consisting of a multifunctional low-molecular

compound residue derived from a multifunctional low-molecular compound having three or

more atoms or groups selected from a halogen atom, a hydroxyl group, a carboxyl group, an acid

halide group, an amino group, an epoxy group and an isocyanato group.

5. (Previously presented) The multi-branched polymer according to any one of claims 2

to 4, wherein the polar polymer chain having polyolefin side chains (A4) is obtained by

homopolymerizing a macromonomer, or copolymerizing two or more macromonomers, selected

from a polyolefin macromonomer (M1) represented by the general formula (V), a polyolefin macromonomer (M2) represented by the general formula (VI) and a polyolefin macromonomer

(M3) represented by the general formula (VII), or by copolymerizing at least one macromonomer 3

MSW/GMD/mua

Application No. 10/797,144 Docket No.: 1188-0118PUS1
Supplemental Amendment dated August 24, 2006

Reply to Office Action of April 5, 2006

selected from (M1), (M2) and (M3) with at least one monomer (B) selected from organic compounds each having at least one carbon-carbon unsaturated bond:

$$\begin{array}{cccc}
R^1 \\
CH_2 = C - P^7
\end{array}$$

$$\begin{array}{cccc}
R^1 & O \\
C & \downarrow & \downarrow & & P^7
\end{array}$$

wherein R^1 is a hydrogen atom or a methyl group, Y is a heteroatom or a heteroatom-containing group, and P^7 is a polymer chain obtained by homopolymerizing or copolymerizing an olefin represented by CH_2 = CHR^2 whereupon R^2 is a group or an atom selected from a C_{1-20} hydrocarbon group, a hydrogen atom and a halogen atom.

6. (Previously presented) The multi-branched polymer according to any one of claims 2 to 4, wherein the polyolefin chain (A1) is a polymer chain obtained by homopolymerizing or copolymerizing an olefin represented by CH₂=CHR³ whereupon R³ is a group or an atom selected from a C₁₋₂₀ hydrocarbon group, a hydrogen atom and a halogen atom.

Application No. 10/797,144 Docket No.: 1188-0118PUS1 Supplemental Amendment dated August 24, 2006

Reply to Office Action of April 5, 2006

7. (Previously presented) The multi-branched polymer according to claim 2, wherein the polyolefin chain having polar polymer side chains (A2) comprises a unit (C1) represented by the general formula (VIII) and a unit (C2) represented by the general formula (IX):

wherein R^4 is a group or an atom selected from a C_{1-20} hydrocarbon group, a hydrogen atom and a halogen atom, R^5 is a C_{1-20} hydrocarbon group, Z is a heteroatom or a heteroatom-containing group, and W is a polymer chain obtained by (co)polymerizing an addition-polymerizable monomer (D), a ring-opening polymerizable monomer (E) and at least one monomer selected from polyolefin macromonomers (M1) to (M3) represented by the general formulae (V) to (VII).

- 8. (Previously presented) The multi-branched polymer according to any one of claims 2 to 4, wherein the polar polymer chain (A3) is obtained by polymerizing an addition-polymerizable monomer (D) or a ring-opening polymerizable monomer (E).
- (Previously presented) A thermoplastic resin composition comprising the multibranched polymer according to any one of claims 2 to 4.

Application No. 10/797,144 Docket No.: 1188-0118PUS1 Supplemental Amendment dated August 24, 2006

Reply to Office Action of April 5, 2006

10. (Previously presented) A film, a sheet, an adhesive resin, a compatibilizing agent, a

resin modifier, a resin additive, a filler dispersant or a dispersant, which comprises the multi-

branched polymer according to any one of claims 2 to 4.

11. (Original) A film, a sheet, an adhesive resin, a compatibilizing agent, a resin modifier,

a resin additive, a filler dispersant or a dispersant, which comprises the thermoplastic resin

composition according to claim 9.

6
